The African Statistical Yearbook 2016 was prepared under the aegis of the African Statistical Coordination Committee set up by major continental organizations dealing with statistical development, namely: the African Development Bank (AfDB), the African Capacity Building Foundation (ACBF), the African Union Commission (AUC), and the United Nations Economic Commission for Africa (ECA) within the framework of the implementation of the Reference Regional Strategic Framework for Statistical Capacity Building in Africa (RRSF).

It was prepared under the overall guidance of Dr. Charles Leyeka Lufumpa, Director of the Statistics Department of the AfDB, Mr. Oliver J.M. Chinganya, Director African Centre for Statistics (ACS) of ECA, Dr. René N'Guettia Kouassi, Director of Economic affairs (AUC), and the leadership of Mr. Maurice Mubila, Officer in Charge of Economic and Social Statistics Division at the AfDB, Dr. Imani Younoussa, Head of Statistics Division at AUC, and Dr. Chukwudozie Ezigbalike, Chief Data Technology Section, ECA.

The joint AfDB-AUC-UNECA Technical Team comprised the following personnel. From the AfDB: Mr. Slaheddine Saidi, Mr. Chaouch Anouar, Mr. Christophe Baradandikanya, Mr. Mohamed Ben M'Barek, Mr. Kadisha Mbiya Hilaire, Mr. Louis Kouakou, Ms Amel Kchouk, and Mr. Jerbi Slim. From the ECA: Mr. Negussie Gorfe, Mr. David Boko, Mr. Léandre Ngogang Wandji, Mr. Yared Bekele, Ms. Meaza Bekele, Mr. Tesfaye Belay, Mr. Elias Fisseha, Mr. Molla Hunegnaw, Mr. Haile Mulualem and Mr. Thomas Sinmegn. From the AUC: Mr. Jose Awong Alene, Mr. Nougbohoue Samson Bel-Aube, Mr. Paul Kutoati, Mrs Selamawit Mussie, Ms. Theresa Watwi Ndavi, Mr. Oumar Diop, Mr. Gildas C. Nzingoula, Ms. Lyse Rurangwa, Mr. Brighton Mutasa (ADEA) Mr Abdoulaye Oueddo (AFREC) and USAID for their financial support given to AUC.

L'Annuaire Statistique pour l'Afrique 2016 a été élaboré sous l'égide du Comité Africain de Coordination de la Statistique adopté par les principales organisations du continent en charge du développement de la statistique, à savoir, la Banque Africaine de Développement (BAD), la Fondation Africaine de Renforcement des Capacités (ACBF), la Commission de l'Union Africaine (CUA), et la Commission Economique pour l'Afrique des Nations Unies (ECA) dans le cadre de la mise en oeuvre du Cadre Stratégique Régional de Référence pour le renforcement des capacités statistiques en Afrique (CSRR).

Il a été conçu sous la direction générale du Dr. Charles Leyeka Lufumpa, Directeur du Département des statistiques de la BAD, de Mr. Oliver J.M. Chinganya, Directeur, Centre africain pour les statistiques (CAS) de la CEA, de Dr. René N'Guettia Kouassi, Directeur des affaires économiques de la CUA et sous la conduite de M. Maurice Mubila, Chef de Division par intérim de la division des Statistiques Economiques et Sociales à la BAD, et Dr Imani Younoussa, Chef de la Division Statistique à la CUA et Dr. Chukwudozie Ezigbalike à la CEA.

L'équipe technique conjointe BAD, CUA, CEA a été composée du personnel suivant. Pour la BAD: M. Slaheddine Saidi, M. Chaouch Anouar, M. Christophe Baradandikanya, M. Mohamed Ben M'Barek, M. Kadisha Mbiya Hilaire, M. Louis Kouakou, Mlle Amel Kchouk, et M. Jerbi Slim. Pour la CEA: M. Negussie Gorfe, M. David Boko, M. Léandre Ngogang Wandji, M. Yared Bekele, Mlle Meaza Bekele, M. Tesfaye Belay, M. Elias Fisseha, M. Molla Hunegnaw, M. Haile Mulualem, et M. Thomas Sinmegn. Pour la CUA: Messieurs Jose Awong Alene, M. Nougbohoue Samson Bel-Aube, Paul Kutoati, Mme Selamawit Mussie, Mlle Theresa Watwi Ndavi, M. Oumar Diop, M. Gildas C. Nzingoula, Mlle Lyse Rurangwa, M. Brighton Mutasa (ADEA) M. Abdoulaye Oueddo (AFREC) et USAID pour le soutien financier accordé à la CUA.

2016

Foreword

Avant-propos

The African Statistical Yearbook (ASYB) 2016 is the eighth edition jointly produced by the African Development Bank (AfDB), the African Union Commission (AUC), and the United Nations Economic Commission for Africa (ECA). It is a result of the fruitful collaboration that exists among the three pan-African organizations within the field of statistics. This synergistic collaboration has two principal benefits: (1) it minimizes the risk of inconsistent information being produced by the three organizations, and (2) it reduces the reporting burden on member states, who might otherwise be obliged to submit data separately to each institution.

As with the previous seven editions, this 2016 edition presents a time series showing how African countries performed on several economic and social indicators over the period 2007–2015.

As our collective efforts to build the capacity of national statistical systems bear fruit, we are able to use more national data for the country tables, in some cases even to source data directly from online dissemination facilities of national statistical offices (NSOs) – as the custodians of countries' official statistics and coordinators of the National Statistical Systems.

Invariably, there are some data sets that have to be sourced from international organizations that have been designated to compile comparable statistics on specific themes for the whole world, including Africa. Still it is important that such series are confirmed by the countries so that any variations resulting, for instance from methodological differences, are reconciled before compiling the final figures in the ASYB. We have therefore continued to emphasize the importance of involving our member states in the validation process. In that regard, each country received a draft of the country tables to review and correct as necessary. Thereafter, representatives of selected NSOs were convened in a validation workshop for further discussion and clarification of outstanding issues.

L'édition 2016 de l'Annuaire Statistique pour l'Afrique (ASA) est la huitième à être produite conjointement par la Banque Africaine de Développement (BAD), la Commission de l'Union Africaine (CUA) et la Commission Économique des Nations Unies pour l'Afrique (CEA). C'est le fruit du renforcement continu de la collaboration qui existe entre ces trois institutions panafricaines dans le domaine statistique. Cette collaboration permet aux trois institutions de réduire : (1) le risque de publier des données incohérentes sur l'Afrique, et (2) le fardeau sur nos États membres qui, autrement, auraient à soumettre les mêmes données à trois reprises.

Comme pour les sept éditions précédentes, cette édition 2016 présente des séries temporelles montrant les performances des pays africains dans plusieurs domaines économiques et sociaux sur la période 2007–2015.

Nos efforts collectifs pour renforcer les capacités des systèmes statistiques africains ayant commencé à porter des fruits, nous sommes maintenant en mesure d'utiliser plus de données de sources nationales pour les profils statistiques des pays ; dans certains cas, nous sommes même en mesure de collecter des données directement à partir des systèmes de diffusion en ligne des Instituts Nationaux de la Statistique (INS) – en tant que dépositaires des statistiques officielles des pays et coordinateurs des Systèmes Statistiques Nationaux.

Inévitablement, certaines données doivent être collectées à partir de sources internationales qui sont mandatées pour produire des statistiques comparables dans des domaines spécifiques pour le monde entier, y compris l'Afrique. Néanmoins, il est important que de telles séries soient confirmées par les pays de telle sorte que toutes les divergences, résultant par exemple de l'application de méthodologies différentes, soient réconciliées avant la diffusion des données définitives dans l'annuaire statistique. Nous avons par conséquent continué à souligner

Users of this publication may observe differences between figures published here and those published elsewhere. These are unavoidable as a result, for instance, of different release dates and associated stages of the datasets in the compilation process at the time of the respective releases. As a result of these differences, one may observe apparent discrepancies between values published in the 2015 edition of the ASYB, as member states or international data providers recompute data series based on improved or otherwise revised data points and/or models. Differences may also be observed between data from national sources and those published and disseminated by international organizations due to the fact that the latter may have been adjusted for comparability between countries.

The yearbook continues to serve the intended purpose of bringing together, in one volume, data on African countries for policy-makers, researchers and other users. We are therefore committed to continue producing, jointly, the African Statistical Yearbook on an annual basis. And bearing in mind that the original collection of the statistics takes place at the national level, we shall continue in our efforts, again jointly, to continuously reinforce the capacities of the national structures to produce quality and credible statistics, first for their development needs, and then to feed into appropriate continental and global databases and repositories.

l'importance d'impliquer nos états membres dans le processus de validation. Dans cette optique, chaque pays reçoit une copie de la version initiale de son profil statistique afin d'en faire la revue et d'apporter des corrections le cas échéant. Ensuite, des représentants d'instituts nationaux de la statistique choisis sont invités à un atelier de validation pour continuer les discussions et apporter des éclaircissements sur les questions en suspens.

Les utilisateurs de cette publication ne manqueront pas d'observer des différences entre les données publiées ici et celles fournies par d'autres sources. Ceci est inévitable en raison, entre autres, des différentes dates de publications des données et des différentes versions des données qui sont publiées selon les étapes du processus de compilation. Comme résultats de ces différences, l'on peut avoir l'impression qu'il y a des divergences entre les données publiées dans l'édition 2015 de l'annuaire statistique et celles publiées dans la présente édition. Ceci est dû au fait que les pays membres et les fournisseurs internationaux de données recalculent les séries en tenant compte de nouvelles informations et/ou de modèles plus récents. Des différences peuvent aussi apparaître entre les données issues de sources nationales et celles issues de sources internationales car ces dernières ajustent dans certains cas les données pour les rendre comparables sur le plan international.

L'annuaire statistique pour l'Afrique continue de servir sa mission qui est de regrouper en un seul volume des données sur les pays africains à l'usage des décideurs politiques, des chercheurs ainsi que d'autres catégories d'utilisateurs. Nous réaffirmons notre engagement à produire conjointement cette publication sur une base annuelle. Compte tenu du fait que la production de statistiques a lieu essentiellement au niveau national, nous continuerons nos efforts conjoints pour renforcer les capacités des structures nationales afin qu'elles soient en mesure de produire des statistiques fiables et de qualité, d'abord pour leurs propres besoins de développement, ensuite pour alimenter les bases de données continentales et mondiales.

**T**he Yearbook series is a result of joint efforts by major African regional organizations to set up a joint data collection mechanism of economic and social data on African countries as well as the development of a common harmonized database. The Joint African Statistical Yearbook is meant to break with the practices of the past where each regional/sub-regional organization was publishing statistical data on African countries of the continent in an inefficient way, leading to duplication of efforts, inefficient use of scarce resources, increased burden on countries and sending different signals to users involved in tracking development efforts on the continent. It is expected that the joint collection and sharing of data between regional institutions will promote wider use of country data, reduce costs and significantly improve the quality of the data and lead to better monitoring of development initiatives on the continent.

The data in this issue of the Yearbook are arranged generally for the years 2007 to 2015 or for the last nine years for which data are available.

The Yearbook is published in one volume consisting of two parts: a set of summary tables followed by country tables.

**L**a série de publication de l'annuaire est le résultat des efforts conjoints des principales organisations régionales africaines pour disposer d'un mécanisme commun de collecte des données économiques et sociales et d'une base de données commune et harmonisée sur l'ensemble des pays africains. L'annuaire statistique commun marque le début d'une rupture avec les pratiques du passé où chaque organisation régionale/sous régionale éditait des données statistiques sur les pays africains d'une manière inefficace. En effet, ces anciennes pratiques conduisaient à la duplication des efforts, à une mauvaise utilisation des ressources rares et à l'accroissement du fardeau de la collecte des données sur les pays. En même temps, elles envoyaient des messages disparates aux utilisateurs impliqués dans les efforts de suivi du développement du continent. On s'attend à ce que la collecte en commun et le partage des données entre les institutions régionales favorisent une utilisation plus large des données des pays, réduisent leurs coûts d'accès, améliorent de manière significative leur qualité et conduiront à un meilleur suivi des initiatives de développement du continent.

Les données de la présente édition de l'annuaire portent généralement sur la période allant de 2007 à 2015 ou sur les neuf dernières années pour lesquelles des données sont disponibles.

L'annuaire est édité en un volume composé de deux parties : un ensemble de tableaux synoptiques et un ensemble de profils-pays.

2016

General notes  
Notes générales

The statistics presented in the Yearbook are, as possible in accordance with international recommendations and definitions. Where important deviations are known to exist, they are indicated in footnotes at the end of each country's table. Owing to the rounding of figures, the totals shown in tables do not always correspond exactly to the sum of their component items.

## I. SOCIAL AND DEMOGRAPHIC INDICATORS

### Population

Data presented in this section, are derived mainly from the following publications: «World Population Prospects, estimates and projections of the UN Secretariat Population Division», «World Urbanisation Prospects» and «Labour Force Estimates and Projections, 1980-2020» prepared by the International Labour Organisation (ILO). National sources have been used to supplement missing data when comparable with the UN series.

#### *Mid-year population*

Unless otherwise stated, the figures shown relate to de facto population. Population (Urban) refers to the number of persons living in areas defined as urban according to national definitions of this concept. Since national definitions differ, cross-country comparisons should be made with care.

#### *Average annual growth rate*

The number of people added to (or subtracted from) a population in a year due to natural increase and net migration expressed as a percentage of the population at the beginning of the time period. Average annual population growth is the exponential rate of growth of midyear population from year  $t-1$  to  $t$ , expressed as a percentage.

#### *Crude birth rate*

Number of births over a given period divided by the person-years lived by the population over that

period. It is expressed as number of births per 1,000 populations.

#### *Crude death rate*

Number of deaths over a given period divided by the person-years lived by the population over that period. It is expressed as number of deaths per 1,000 population:

#### *Population by age groups*

Three age groups are used in order to highlight the proportion of active population vis-à-vis the dependant population. Population aged 15-64 is the number of people who could potentially be economically active, excluding children.

#### *Economically active population*

The economically active population comprises all employed and unemployed persons (including those seeking jobs for the first time). It covers employers, persons working on their own account, salaried employees, wage earners, unpaid family workers, and members of producers' co-operatives and members of the armed forces.

#### *Life expectancy, Crude birth and death rates*

Life expectancy at birth is the average number of years a new-born infant would live if prevailing patterns of mortality of the total population at the time of his/her birth were to stay the same throughout his/her life. Crude birth and death rates represent the number of live births and the number of deaths respectively per 1000 people. Death is the permanent disappearance of all evidence of life at any time after live birth has taken place (postnatal cessation of vital functions without capability of resuscitation). This definition excludes foetal deaths.

#### *Net reproduction rate*

The net reproduction rate is the average number of daughters that would be born to a woman if she passed through her lifetime conforming to the age-specific fertility and mortality rates of a given year. This rate is similar to the gross reproduction rate

but takes into account that some women will die before completing their childbearing years.

### **Total fertility rate**

The total fertility rate is the average number of children that would be born per woman if she experiences no mortality and were subject to a given set of age-specific fertility throughout her lifetime.

## **Health**

### **Percentage of mothers provided at least one antenatal care**

Antenatal care coverage (at least one visit) is the percentage of women aged 15–49 with a live birth in a given time period that received antenatal care provided by skilled health personnel at least once during their pregnancy.

### **Percentage of deliveries attended by skilled health personnel**

Percentage of births attended by skilled health personnel (doctors, nurses or midwives) is the percentage of deliveries attended by health personnel trained in providing lifesaving obstetric care, including giving the necessary supervision, care and advice to women during pregnancy, labour and the post-partum period; conducting deliveries on their own; and caring for new-borns. Traditional birth attendants, even if they receive a short training course, are not included.

### **Births registered (%)**

The percent of births registered during a specified time period for a country or designated region.

### **Deaths registered (%)**

The percent of deaths registered during a specified time period for a country.

### **Physicians (per 10 000 population)**

Practising physicians, practising general practitioners, practising specialists refers to the number of

physicians, general practitioners and specialists (including self-employed) who are actively practicing medicine in public and private institutions. The data should exclude dentists, stomatologists, qualified physicians who are working abroad, working in administration, research and industry positions. Data should include foreign physicians licensed to practice and actively practicing medicine in the country. Data should be calculated to represent full-time equivalents.

### **Nurses (per 10 000 population)**

Nurses refers to the total number of nurses certified or registered and who actively practicing in public and private hospitals, clinics and other health facilities, including self-employed. Nursing assistants and midwives should be included. Data should exclude nurses who are working abroad, working in administrative, research and industry positions. The figures for physicians and nurses relate to those registered at the government offices.

### **Hospital beds - Total (per 10 000 population)**

The number of hospital beds is calculated for public and private hospitals.

### **Percentage of children provided the vaccines (BCG, DPT3, Polio, Measles)**

Child immunization measures the percentage of children ages 12-23 months who received specific vaccinations before 12 months or at any time. A child is considered adequately immunized against measles after receiving one dose of vaccine.

A child is considered adequately immunized against:

- Diphtheria, pertussis (or whooping cough), and tetanus (DPT) after receiving three doses of vaccine;
- Measles after receiving one dose of measles vaccine;
- Tuberculosis after receiving Bacille Calmette-Guérin vaccine (BCG);
- Polio after receiving the three doses of polio vaccine.

## *Access to safe water*

It is measured by the number of people who have a reasonable means of getting an adequate amount of clean water, expressed as a percentage of the total population.

## **Education**

The sources of the data on education, reported in this publication, consist of national publications and the UNESCO Statistical Yearbook. Data presented generally relate to the public (official) and private (independent) schools. The indicated years refer to the beginning of school year. Adult education, apprenticeship courses and correspondence schools are excluded. Owing to variations in school systems, caution needs to be exercised when comparing the data across countries.

## *Student enrolment at specific level*

First level student enrolment is the number of pupils enrolled at the primary level of education, regardless of age. Second level student Enrolment is the total number of students enrolled at the secondary level of education, regardless of age.

## *Adult Illiteracy Rate*

Percentage of persons aged 15 and over who cannot read and write.

## *Pupil-Teacher ratio*

Pupil-teacher ratio is the average number of pupils (students) per teacher at a specific level of education in a given school-year.

## *Gender Parity Index*

Gross rate of Registration on the Girls Boys, expressed as having a value of one when there is gender parity. Parity index between gender (PIG) measures progress in achieving gender parity in education participation and / or learning opportunities available to women compared to those available to men. This is a comparison of values assigned to women and men for a given indicator in a given

year. It also reflects the level of development of women in society.

This indicator should be disaggregated by level of education (pre-primary, primary and secondary).

## **II. NATIONAL ACCOUNTS**

This section provides information on national accounts. National accounts data provide essential information on the economic performance of African countries in terms of growth and structure of output, investments and savings. National accounts data are obtained from various national sources and supplemented with data from international sources such as the UN Yearbook of National accounts and AfDB and ECA African Centre for Statistics estimates. Where necessary, official figures have been adjusted to conform to the System of National Accounts (SNA). Many countries continue to compile their national accounts in accordance with the 1968 SNA, but more and more are adopting the 1993 SNA. A few countries still use concepts from older SNA guidelines, including valuations such as factor cost, in describing major economic aggregates.

## **Gross Domestic Product (GDP)**

Gross Domestic Product is an aggregate measure of production equal to the sum of the gross values added of all resident institutional units engaged in production (plus any taxes, and minus any subsidies, on products not included in the value of their outputs).

## **GDP by kind of economic activity (by sector)**

GDP by sector gives value-added by the broad categories of the ISIC classification. Value added is evaluated at basic prices or factor cost at producer prices depending on the current practice in the country. Data is provided at current prices and in terms of growth rates over the previous year based on data at constant prices.

## Expenditure on GDP

### *General Government final consumption*

General Government final consumption expenditure comprises all current expenditure for purchases of goods and services by all levels of government, as well as capital expenditure on national defence and security.

### *Private final consumption*

Household final consumption expenditure represents the final consumption of households and non-profit institutions. It includes imputed rent for owner-occupied dwellings but excludes purchases of dwellings and it also includes any statistical discrepancy.

### *Gross capital formation*

Gross capital formation consists of gross domestic fixed capital formation plus net changes in the level of inventories.

### *Exports and imports of goods and services*

Exports and imports of goods and services refer to the value of goods and non-factor services provided to or from the rest of the world. They do not include receipts and payments for factor services such as investment income, interest and labour income. The data are generally estimated on the basis of foreign trade statistics and are not directly comparable with those from the balance of payments.

## III. INFLATION

Inflation is measured by the annual percent changes in Consumer price index. Consumer price index (CPI) shows the cost of acquisition of a basket of goods and services purchased by the average consumer. Weights for the computation of the index numbers are obtained from household budget surveys. CPI data are provided by the national statistical systems, mainly by the national bureau of statistics or Central banks.

## IV. AGRICULTURAL PRODUCTION

### *Agricultural production*

The data on major crops produced is obtained from the National Statistical Offices of the following countries; Burkina Faso, Burundi, Cameroon, Congo, Côte d'Ivoire, Democratic Republic of Congo, Gabon, Gambia, Guinea-Bissau, Kenya, Lesotho, Madagascar, Malawi, Mali, Mauritania, Mauritius, Morocco, Mozambique, Nigeria, Senegal, Sudan, Swaziland, Zambia, and Zimbabwe. For the remaining countries the data is obtained from the online database of the Food and Agricultural Organization (FAO). For those countries, the five major crops per country are obtained by calculating the average yearly production of each crop produced by a given country (considering only years when the crop is produced); and ranking it in descending order.

### *Agricultural and food production index*

The various indices of agricultural production illustrate the relative level of the aggregate volume of agricultural production for each year, in comparison with the base period 2004-2006. These indices of agricultural production obtained from the FAO online database are computed using the Laspeyres formula, using the price weighted sum of the production of various commodities less seed and feed. The price used for weighting the production quantity of each commodity is the average price during the years indicated as the base year.

## V. MINING PRODUCTION

The sources of the data reported are national statistical offices (for those countries for which the AfDB, AUC and ECA questionnaire was sent), the United Nations Industrial Commodity Database accessed through UNDATA (at <http://data.un.org/>) and the United Nations Industrial Commodity Yearbook.

Data for some of the minerals were also obtained from British Geological Survey, and the United States Geological Survey website.

### *Mining production*

For a details description of the minerals included in this publication, the user may refer to the Central Product Classification (CPC) Ver.1.1, Statistical Papers, Series M, No.77, Ver.1.1 (United Nations publication, Sales No. E.03.XVII.3). It was difficult to identify the three major commodities for each country because of the reference period being too narrow and commodities varying from one country to another. First, we obtained the export values of minerals for the years 2005 through 2013. We then considered the average value (considering only years when the commodity is available) to help us decide which commodity to include in the publication. In addition, we decided to choose strategic commodities (such as oil, gas and diamonds) when the country is produces them.

## **VI. ENERGY**

The data provided for this section are from the United Nations Energy Statistical Yearbook and the Energy Database which could be accessed through UNDATA (at <http://data.un.org/>), also from African Energy Commission (AFREC).

### *Electricity production*

The figures reported for production refer to gross generation of electricity, which include the consumption by station auxiliaries and any losses in transformers as well as electricity generated by pumping stations without deducting the electric energy consumed by the pumps. The production of electricity could fall into public utilities, whose primary purpose is to generate and transmit electric energy for use by the public, and self-producers, undertakings which produce electric energy intended, in whole or in part, for their own uses.

## **VII. TOURISM AND INFRASTRUCTURE**

### *Tourism*

Data on Tourism have been primarily collected from National sources, and where national sources are not available, from the online databases UNWTO and Tourism Decision Metrics of Tourism Economics.

The indicators published are the number of arrivals in the country, the number of hotel rooms, overnight stays, tourism receipts, Tourism total contribution to GDP and Tourism total contribution to employment. The number of tourists to a country, unless otherwise stated, refers to all persons (checked at the frontier) travelling for pleasure, health, business, meetings or studies and stopping in that country for twenty-four hours or more. The figures exclude immigrants and residents in a frontier zone.

### **Infrastructure**

#### *Paved Road (% of total)*

Paved roads are those surfaced with crushed stone (macadam) and hydrocarbon binder or bituminized agents, with concrete, or with cobblestones, as a percentage of all the country's roads, measured in length.

#### *Total Network (Railways-km)*

Rail lines are the length of railway route available for train service, irrespective of the number of parallel tracks.

#### *Main Telephone Lines*

Telephone lines are fixed telephone lines that connect a subscriber's terminal equipment to the public switched telephone network and that have a port on a telephone exchange. Integrated services digital network channels and fixed wireless subscribers are included.

### *Mobile Cellular Subscribers*

Mobile cellular telephone subscriptions are subscriptions to a public mobile telephone service using cellular technology, which provide access to the public switched telephone network. Post-paid and prepaid subscriptions are included.

## **VIII. FINANCIAL AND MONETARY STATISTICS**

### **Monetary Statistics**

Data for this section are essentially obtained from the IMF International Financial Statistics Database and National Central Banks.

### *Money supply (M1)*

Money supply comprises transferable deposits and currency outside deposit money banks.

### *Quasi money*

Quasi money comprises time, savings and foreign currency deposits.

### *Net foreign assets*

Net foreign assets equal the sum of foreign assets, less the sum of foreign liabilities of monetary authorities and deposit money banks.

### *Domestic credit*

Domestic credit includes all domestic assets of the banking system. It is the sum of claims on the central government (net), on official entities and the private sector. Credit to the private sector is shown separately but as a subset of domestic credit.

### *International reserves*

International reserves consist of the country's holding of monetary gold, Special Drawing Rights (SDRs) and foreign exchange, as well as its reserve position in the International Monetary Fund (IMF).

### *Exchange rates*

Exchange rates expressed in national currency unit per US dollar unit are reported as end period and period averages of market exchange rates and official rates. The market rate is defined as the rate determined largely by market forces; and the official rate is that determined by the authorities.

### **Public Finance**

Data for this section have been primarily collected from National Authorities such as National Statistics Offices, Ministries of Finance and Central Banks; and where national sources are not available; data from IMF publications (Country Reports) are used.

For countries: Botswana, Egypt, Ethiopia, Kenya, Malawi, Mauritius, Namibia, South Africa and Swaziland, the data were compiled following their respective fiscal period as annual data. Therefore, the years 2006 – 2014 represent the ending calendar year according to the fiscal period of each country.

### *Revenue and grants*

It includes all non-repayable receipts, required and unrequired, current and capital, and non-compulsory, non-repayable, unrequired receipts from other governments (domestic or foreign) and international institutions.

### *Tax revenue*

It includes compulsory, unrequited, non-repayable contributions exacted by a government for public purposes.

### *Non-tax revenue*

It includes required receipts from property incomes, fees and charges, non-industrial and incidental sales, the cash operating surpluses of departmental enterprises and unrequited receipts such as fines, forfeits and current private donations.

## **Grants**

Unrequited, non-repayable, non-compulsory government receipts from other governments or international institutions.

## **Expenditure and net lending**

It includes all non-repayable payments by government, whether required or unrequired and whether current or capital, as well as government transactions in debt and equity claims upon others acquired for purposes of public policy.

## **Current Expenditure**

It includes all non-repayable payments by government, whether required or unrequired, other than capital expenditure or grants.

## **Capital Expenditure**

Expenditure for acquisition of fixed capital assets, stocks, land or intangible assets plus unrequited transfers for the purpose of permitting the recipient to acquire such assets. In order to be classified as a capital asset, an asset acquired must exceed a minimum value and be intended for use for more than one year in the process of production.

## **Net lending**

Net lending (lending minus repayments) comprises government transactions in claims upon others acquired for purposes of public policy rather than for management of government liquidity or earning a return. It covers both debt and equities and both payments and receipts.

## **Fiscal Balance**

Fiscal balance or Government overall surplus/deficit is defined as total revenue and grants received less total expenditure and net lending.

## **Balance of Payments**

The Balance of payments is a statistical statement that summarizes, for a specific period, the economic

transactions of an economy with the rest of the world. Transactions for the most part between residents and non-residents consist of those involving goods, services, and income; those involving financial claims on, and liabilities to, the rest of the world; and those classified as transfers which involve offsetting entries to balance, in an accounting sense, one-sided transactions. Data in this section are obtained from African Central Banks and where data are not available from national sources or if country data do not meet the required quality, IMF Country Reports are also used. Data from international sources relate to the following countries: Central African Republic, Eritrea and Guinea.

## **Trade balance**

Trade balance is equal to exports less imports of goods, both measured on the « free-on-board » (f.o.b.) basis that is, by the value of the goods at the border of the exporting country. Goods cover general merchandise, goods for processing, repairs on goods, goods procured in ports by carriers, and non-monetary gold.

## **Services balance**

Services include transportation (freight and passenger transportation); travel; communication services; construction services; insurance services; financial services; computer and information services; royalties and license fees; personal, cultural, and recreational services; government services. Service Balance is defined as exports minus imports of services.

## **Net income**

Income includes compensation of employees which covers wages, salaries, and other benefits; investment income which consist of direct investment income, portfolio investment income and other investment income. Net income is income received from investments abroad less income paid to foreigners investing in the country.

### **Compensation of employees**

Compensation of employees includes salaries, wages, salaries paid by non-resident employers to their resident employees and vice versa.

### **Investment Income**

Investment income covers direct investment income, portfolio investment income (equity and debt) and other investment income (interest from other financial transactions).

### **Current transfers**

Current transfers consist of all transfers that do not involve: (i) transfers of ownership of fixed assets; (ii) transfers of funds linked to acquisition or disposal of fixed assets; (iii) forgiveness, without any counterparts being received in return, of liabilities by creditors.

### **Net official transfers**

It comprises net transfer payment between governments of the reporting country and the rest of the world

### **Workers' remittances**

Workers' remittances return amounts transferred abroad by resident workers and vice versa

### **Other private transfers**

Other private transfers comprise net transfer payments between private persons and non-official organizations of the reporting country and the rest of the world that carry no provisions for repayments.

### **Current account balance**

Current account balance is the sum of net exports of goods and services, net income, and net current transfers.

### **Capital account**

The capital account covers international capital transfers (e.g. debt forgiveness) and the acquisi-

tion/disposal of non-produced, nonfinancial assets (such as patents).

### **Financial account**

The financial account deals with transactions involving financial claims on, or liabilities to, the rest of the world, including international purchases of securities, such as stocks and bonds.

### **Errors & omissions**

Net Errors & omissions are derived residually as the difference between total of receipts and payments (both current and capital together with the financial account)

### **Overall balance**

The balance of payments is a record of a country's international transactions with the rest of the world. Transactions are organized in two different accounts, the current account and the capital and financial account.

## **External debt and Financial Flows**

Data in this section are mainly obtained from the following international sources: IMF World Economic Outlook database, OECD Online Database and UNCTAD online database. However, few countries have submitted their data and they are published in this edition of the Year book. The purpose of the yearbook is to include data from national sources to the extent possible when the data quality is acceptable. Data from national sources relate to the following countries: Benin, Burkina Faso, Cameroon, Equatorial Guinea, Lesotho, and Niger.

### **External Debt**

External Debt (total outstanding debt) is the amount, at any given time, of disbursed and outstanding contractual liabilities of residents of a country to non-residents to repay principal, with or without interest, or to pay interest with or without principal. It is the sum of public and publicly-guaranteed short

and long-term debt, private non-guaranteed short and long-term debt and the use of IMF credit.

#### **External debt service**

Total External Debt service is the sum of principal repayments and interest actually made. It is debt service payment on short and long term debt (public and publicly-guaranteed and private non-guaranteed) and the use of IMF credit.

#### **Present value of External debt**

Present value of debt is the sum of short-term external debt plus the discounted sum of total debt service payments due on public, publicly guaranteed, and private nonguaranteed long-term external debt over the life of existing loans.

#### **Total Government Domestic debt**

The Total Government Domestic debt consists of liabilities that owed by a country's citizens and government.

#### **Foreign direct investment**

Foreign direct investment refers to investment made to acquire or add to a lasting management interest (usually 10 percent of voting stock) enterprise operating in a country other than that of the investor. It is the sum of equity capital, reinvestment of earnings and other shorthand long-term capital as shown in the balance of payments.

#### **Official development assistance**

ODA relates to grants or concessional loans (i.e. with a grant element of at least 25 percent), undertaken by the official sector, whose main objective is the promotion of economic development and welfare. Data in this section are net disbursements of ODA.

### **IX. EXTERNAL TRADE**

Data for this section are mainly obtained from national sources. This is the case for the following countries: Algeria, Benin, Burkina Faso, Burundi, Cameroon, Côte d'Ivoire, Egypt, Ethiopia, The Gambia, Guinea-Bissau, Kenya, Malawi, Mali, Morocco, Mozambique, Namibia, Niger, Nigeria, Rwanda, Sudan, Swaziland, Tanzania, Togo, Zambia and Zimbabwe. Where national data were not available, we have used the United Nations UNCTAD online database. The names of major Export and Import commodities have been selected by the reporting countries themselves. For the data obtained from UNCTAD the harmonized system (rev1) classification is used to determine the list of main exports and imports commodities. Unless otherwise indicated the import statistics are reported on CIF valuation base while exports are reported on FOB.

Les statistiques présentées dans cet Annuaire sont, autant que possible, conformes aux recommandations et définitions internationales. Lorsque des divergences importantes sont connues, elles sont indiquées dans les notes figurant à la fin du tableau de chaque pays concerné. A cause des chiffres arrondis, les totaux indiqués dans certains tableaux ne correspondent pas toujours exactement à la somme de leurs composantes.

## I. INDICATEURS SOCIAUX ET DÉMOGRAPHIQUES

### Population

Les données présentées dans cette section sont tirées principalement des publications: «Perspectives d'avenir de la population mondiale, estimations et projections», «Perspectives d'Urbanisation Mondiale» de la Division de la Population du Secrétariat de l'ONU, «Estimations et Projections de la Main d'Œuvre, 1980-2020» du Bureau International du Travail (BIT). Les sources nationales ont été utilisées pour compléter les données non disponibles, dans la mesure où elles étaient comparables aux séries de l'ONU.

### Population en milieu d'année

Sauf indication contraire, les chiffres indiqués se rapportent à la population de fait. La population urbaine est le nombre des personnes vivant dans les zones considérées comme urbaines selon les définitions de ce concept dans chaque pays. Etant donné que cette définition varie quelque peu d'un pays à un autre, la prudence s'impose lorsqu'on procède à des comparaisons entre pays.

### Taux de croissance annuel moyen

Le nombre de personnes ajouté (ou soustrait) à une population en un an en raison de l'accroissement naturel et la migration nette exprimée en pourcentage de la population au début de la période de référence.

La croissance annuelle moyenne de la population est le taux de croissance exponentielle de la population en milieu d'année de l'année  $t-1$  à  $t$ , exprimée en pourcentage.

### Taux brut de natalité

Nombre de naissances sur une période donnée divisée par la population totale moyenne au cours de cette période. Elle est exprimée en nombre de naissances pour 1000 habitants.

### Taux brut de mortalité

Nombre de décès sur une période donnée divisée par la population totale moyenne au cours de cette période. Elle est exprimée en nombre de décès pour 1000 habitants.

### Groupes d'âges

Trois groupes d'âge sont utilisés dans le but de mettre en lumière la proportion du groupe d'âge actif par rapport aux dépendants. La population âgée de 15-64 ans est le nombre de personnes qui peuvent potentiellement être économiquement actives, et exclut les enfants.

### Population économiquement active

La population active comprend toutes les personnes employées ou non (y compris celles qui sont à la recherche de leur premier emploi). Elle comprend les employeurs, les travailleurs indépendants, les salariés, les rentiers, les travailleurs familiaux non rémunérés, les membres des coopératives de producteurs et ceux des forces armées.

### Espérance de vie, taux bruts de natalité et de mortalité

L'espérance de vie à la naissance indique le nombre moyen d'années que vivrait un nouveau-né si les tendances de la mortalité observées pour l'ensemble de la population au moment de sa naissance restaient inchangées tout au long de sa vie. Les taux bruts de natalité et de mortalité représentent respectivement le nombre annuel moyen

de naissances et de décès pour 1000 habitants. La mortalité est le fait d'une disparition permanente de toute évidence de vie, à tout moment, après que la naissance ait eu lieu. Cette définition exclut les morts nés.

### **Taux net de reproduction**

Le taux net de reproduction est le nombre moyen de filles qui seraient nées d'une femme si elle a traversé sa vie conformément à la fécondité spécifique par âge et au taux de mortalité pour une année donnée. Ce taux est similaire au taux brut de reproduction, mais prend en compte le fait que certaines femmes mourront avant d'avoir terminé leurs années de procréation

### **Indice synthétique de fécondité**

L'indice synthétique de fécondité est le nombre moyen de naissances qu'une femme soumise à un ensemble de fécondités spécifiques par âge, pourrait avoir au cours de sa période de procréation.

## **Santé**

### **Pourcentage de mères ayant reçu au moins un soin prénatal**

La couverture des soins prénatals (au moins une visite) est le pourcentage de femmes de 15-49 ans, avec une naissance vivante dans une période de temps donnée, qui a reçu des soins prénatals dispensés par un personnel de santé qualifié au moins une fois pendant leur grossesse.

### **Pourcentage d'accouchements assistés par du personnel de santé qualifié**

Pourcentage d'accouchements assistés par un personnel de santé qualifié (médecins, infirmiers ou sages-femmes) est le pourcentage d'accouchements assistés par du personnel de santé qualifié dans la pratique des soins obstétricaux vitaux ( y compris les contrôles nécessaires, les soins et les conseils aux femmes pendant la grossesse, le travail et le période post partum), des accouchements;

et des soins aux nouveau-nés. Les accoucheuses traditionnelles, même si elles reçoivent une formation de courte durée, ne sont pas incluses.

### **Naissances enregistrées (%)**

C'est le pourcentage des naissances enregistrées au cours d'une période de temps spécifiée pour un pays ou une région désignée.

### **Décès enregistrés (%)**

C'est le pourcentage des décès enregistrés pendant une période de temps spécifiée pour un pays.

### **Les médecins (pour 10 000 habitants)**

Les médecins, les médecins généralistes, les médecins spécialistes se réfèrent au nombre de médecins, de généralistes et de spécialistes (y compris les travailleurs indépendants) qui pratiquent activement la médecine dans les établissements publics ou privés. Les données devraient exclure les dentistes, les stomatologues, les médecins qualifiés qui travaillent à l'étranger, ou qui occupent des postes dans l'administration, dans l'industrie ou dans recherche. Les données devraient inclure des médecins étrangers autorisés à exercer et à pratiquer activement la médecine dans le pays. Les données doivent être calculées pour représenter l'équivalent du temps plein de travail.

### **Les infirmières (pour 10 000 habitants)**

Les infirmières se réfère au nombre total d'infirmières certifiées ou enregistrés et qui exercent activement dans les hôpitaux publics et privés, les cliniques et autres établissements de santé, y compris les travailleurs indépendants. Les infirmières auxiliaires et sages-femmes devraient être incluses. Les données devraient exclure les infirmières qui travaillent à l'étranger, qui travaillent dans des postes administratifs, la recherche et dans l'industrie.

Les chiffres pour les médecins et les infirmières se rapportent à ceux enregistrés dans les bureaux du gouvernement.

**Les lits d'hôpitaux – total (pour 10 000 habitants)**

Le nombre de lits d'hôpitaux se calcule pour les hôpitaux publics et privés.

Pourcentage d'enfants a fourni les vaccins (BCG, DTC3, polio, rougeole).

La vaccination des enfants mesure le pourcentage des enfants âgés de 12 à 23 mois qui ont reçu certains vaccins spécifiques avant 12 mois ou à tout moment avant. Un enfant est considéré suffisamment immunisé contre la rougeole après avoir reçu une dose de vaccin.

Un enfant est considéré suffisamment immunisé contre :

- la diphtérie, la coqueluche et le tétanos (DCT) après avoir reçu trois doses de vaccin;
- la rougeole après avoir reçu une dose de vaccin contre la rougeole ;
- la tuberculose après avoir reçu le Bacille Calmette-Guérin (BCG);
- la poliomyélite après la troisième dose du vaccin de la polio.

**Accès à l'eau potable**

Elle est mesurée par le nombre de personnes qui ont un moyen raisonnable d'obtenir une quantité suffisante d'eau potable, exprimée en pourcentage de la population totale.

**Education**

Les sources des données sur l'éducation présentées dans cette publication sont les publications nationales et l'Annuaire statistique de l'UNESCO. Les données présentées portent en général sur les écoles de l'Etat (publiques) et les écoles indépendantes (privées). Les années indiquées se rapportent au commencement de l'année scolaire. Sont exclus la formation des adultes, les stages d'apprentissage et les cours par correspondance. Compte tenu des différences des systèmes scolaires, la comparaison des données présentées est sujette à caution.

**Elèves inscrits selon le degré**

La scolarisation dans le premier degré est le nombre d'enfants de tous âges inscrits à l'école primaire. La scolarisation dans le second degré est le nombre d'élèves de tous âges inscrits dans le cycle d'enseignement secondaire.

**Taux d'analphabétisme des adultes**

C'est le pourcentage des adultes âgés de plus de 15 ans qui ne savent ni lire ni écrire.

**Ratio élèves-enseignants**

Le rapport élève-maître est le nombre moyen d'élèves (étudiants) par enseignant dans un degré d'enseignement déterminé dans une année scolaire donnée.

**Indice de Parité de Genre**

Le taux Brut d'Inscription des Filles relative à celui des Garçons, prend la valeur un quand il y a parité entre les genres. L'indice de parité entre les genres (GPI) mesure les progrès effectués dans la réalisation de la parité de genre dans la participation à l'éducation et/ou aux opportunités d'apprentissage offertes aux femmes par rapport à celles offertes aux hommes. Il s'agit d'une comparaison entre des valeurs attribuées aux femmes et aux hommes pour un indicateur donné au cours d'une année donnée. Il reflète aussi le niveau d'épanouissement des femmes dans la société. Cet indicateur doit être désagrégé par niveau d'enseignement (enseignement pré-primaire, primaire et secondaire)

**II. COMPTES NATIONAUX**

Cette section présente des informations sur la comptabilité nationale. Les données de la comptabilité nationale fournissent des indications essentielles sur la performance économique des pays africains en termes de croissance et de structure de production, d'investissement et d'épargne. Les données de la comptabilité nationale proviennent

de diverses sources nationales et complétées par d'autres sources internationales telles que l'Annuaire de Comptabilité nationale de l'ONU et les estimations de la BAD et du Centre africain pour la statistique de la CEA. Les chiffres officiels ont été ajustés en fonction du Système de Comptabilité Nationale (SCN) quand cela s'est avéré nécessaire. De nombreux pays continuent d'élaborer leurs comptes nationaux à partir du SCN 1968. Mais de plus en plus de pays sont en train de migrer vers le SCN 1993. Certains pays continuent encore d'utiliser les concepts provenant des anciennes recommandations du SCN incluant la comptabilisation des agrégats économiques aux coûts des facteurs.

### **Produit intérieur brut (PIB)**

Le produit intérieur brut est une mesure globale de la production qui est égale à la somme des valeurs ajoutées brutes de toutes les unités institutionnelles résidentes engagées dans le processus de production (plus les taxes indirects/impôt sur les produits et moins les subventions).

### **Le PIB par branche d'activité (par secteur)**

Le PIB par secteur donne la valeur ajoutée pour les grandes catégories de la classification CITC. La valeur ajoutée est évaluée aux prix de base ou aux coûts des facteurs ou encore au prix du producteur selon la pratique en vigueur du pays. Les données nominales sur les valeurs ajoutées sont fournies aux prix courants et les taux de croissance annuels pour chaque catégorie sont calculés à partir des données à prix constants.

### **Emplois du PIB**

#### ***La consommation finale des administrations publiques***

La consommation finale des administrations publiques comprend toutes les dépenses courantes consacrées à l'achat de biens et de services par les administrations de tous les niveaux, ainsi que les dépenses en capital au titre de la défense et de la sécurité nationale.

#### ***La consommation finale privée***

La consommation finale privée représente la consommation finale des ménages et des institutions à but non lucratif. Elle ne comprend pas les achats de logement mais elle inclut le loyer imputé des logements occupés par leur propriétaire. Elle comprend aussi tout écart statistique.

#### ***La formation brute de capital***

La formation brute de capital comprend les dépenses consacrées à l'accroissement du capital fixe de l'économie, majorées des variations nettes du niveau des stocks.

#### ***Les exportations et importations de biens et services***

Les exportations et importations de biens et services représentent la valeur des biens et services non facteurs fournis au reste du monde ou reçus de celui-ci. La valeur des revenus et des paiements des services facteurs comme le produit des placements, les intérêts et le revenu du travail, en est exclue. Les données sont généralement estimées sur la base des statistiques du commerce extérieur et ne sont pas directement comparables à celles de la balance des paiements.

## **III. INFLATION**

L'inflation est mesurée par la variation moyenne annuelle de l'indice des prix à la consommation (IPC). L'IPC montre le coût d'acquisition par un consommateur moyen d'un panier de biens et services. Les coefficients de pondération pour le calcul des indices sont obtenus à partir d'enquêtes sur les dépenses des ménages. Les données de l'IPC proviennent des systèmes statistiques nationaux, et essentiellement des Instituts nationaux de statistique ou des Banques centrales.

## IV. PRODUCTION AGRICOLE

### *Production agricole*

Les données sur les principales productions agricoles sont obtenues via les instituts nationaux de statistiques des pays suivants : Burkina Faso, Burundi, Cameroun, Congo, Côte d'Ivoire, République démocratique du Congo, Gabon, Gambie, Guinée-Bissau, Kenya, Lesotho, Madagascar, Malawi, Mali, Mauritanie, île Maurice, Maroc, Mozambique, Nigeria, Sénégal, Soudan, Swaziland, Zambie, et Zimbabwe. Pour les autres pays les données sont tirées de la base de données en ligne de l'Organisation pour l'Alimentation et l'Agriculture (FAO). Pour ces pays, les cinq principales productions agricoles sont obtenues en calculant la production annuelle moyenne de chaque produit du pays (seules les années où le produit est récolté sont retenues) et en rangeant ces productions par ordre décroissant.

### *Indices de la production agricole et alimentaire*

Les différents indices de la production agricole illustrent le niveau du volume global de production agricole chaque année, relativement à la période de base 2004-2006. Ces indices sont obtenus à partir de la base de données en ligne de la FAO et calculés en utilisant la formule de Laspeyres somme pondérée par les prix des productions des différents produits hors semences et graines d'alimentation. Le prix utilisé pour pondérer la quantité de chaque produit est le prix moyen au cours des années de référence.

## V. PRODUCTION MINIERE

Les sources des données présentées sont soit : les instituts nationaux de statistiques, pour les pays auxquels le questionnaire conjoint BAD - CUA - CEA a été envoyé, soit : la base des données sur les produits industriels des Nations Unies, accessible

via UNDATA (à <http://data.un.org/>) ou l'annuaire des produits industriels des Nations Unies. Pour certains minerais, les données ont également été obtenues à partir de l'enquête géologique britannique et sur le site internet de l'enquête géologique des Etats-Unis.

### *Production minière*

Pour les descriptions détaillées des produits miniers inclus dans cette publication, le lecteur peut se référer à la Classification Centrale des Produits (CCP), Papiers statistiques, Séries M, N077, Ver 1.1 (Publication des Nations Unies, Ventes N0. E.03. XVII.3). Il était difficile d'identifier les trois principaux produits puisque la période de référence était très variable et courte pour plusieurs produits et aussi les produits varient d'un pays à un autre. Dans un premier temps, nous avons obtenu les valeurs des exportations des produits miniers pour les années 2005 à 2013. Nous avons ensuite agrégé sur la période où le produit est disponible avant de calculer la moyenne pour pouvoir décider quel produit à inclure dans la publication. Finalement, nous avons décidé de choisir les produits stratégiques (tels que le pétrole, le gaz et le diamant) lorsque le pays continue de les produire.

## VI. ENERGIE

Les sources des données publiées proviennent de l'Annuaire statistique sur l'énergie des Nations Unies et de la base de données sur l'énergie accessible à travers UNDATA (<http://data.un.org/>) et aussi de la Commission africaine sur l'Energie (AFREC).

### *Production d'électricité*

Les chiffres publiés pour la production sont relatifs à la production brute d'électricité, qui inclut la consommation des stations auxiliaires et toutes pertes dans la transformation et aussi l'électricité produite par les stations de pompage sans déduction de l'énergie consommée par ces mêmes

pompes. La production d'électricité comprend, d'une part, les installations publiques, dont le but primaire est la génération et la transmission de l'énergie électrique pour la consommation publique, et d'autre part, les producteurs privés qui produisent l'énergie électrique, totalement ou en partie, pour leur propre consommation.

## VII. TOURISME ET INFRASTRUCTURE

### Tourisme

Les données sur le tourisme ont été principalement collectées auprès de sources nationales ; quand les sources nationales ne sont pas disponibles, les données sont tirées des bases des données en ligne UNWTO et Tourism Decision Metrics (TDM) de Tourism Economics.

Les indicateurs publiés sont le nombre d'arrivées dans, le nombre de chambres d'hôtel, le nombre de nuitées, les recettes touristiques, la contribution totale du tourisme au PIB et la contribution totale du tourisme à l'emploi. Le nombre de touristes d'un pays se rapporte, sauf indication contraire, à toutes les personnes contrôlées à la frontière et voyageant pour le plaisir, la santé, les affaires, les réunions ou les études, s'arrêtant dans le pays pour vingt-quatre heures ou plus. Les données excluent les immigrants et résidents frontaliers.

### Infrastructure

#### *Route pavée (% du total)*

Les routes pavées sont celles dont la surface est construite avec de la pierre concassée (macadam) et de liant hydrocarboné ou d'agents bitumineux, du béton ou de pavés. Le dénominateur est l'ensemble des routes du pays, mesurées en longueur.

#### *Réseaux total (Railways-km)*

Le total des lignes ferroviaires est la longueur de l'itinéraire disponible pour le service de train de

chemin de fer, quelque soit le nombre de pistes parallèles.

#### *Lignes téléphoniques principales*

Les lignes téléphoniques sont les lignes téléphoniques fixes qui relient l'équipement terminal d'un abonné au réseau public commuté téléphonique et qui ont un port sur un central téléphonique. Les réseaux de canaux de service numérique intégrés et les abonnés fixes sans fil sont inclus.

#### *Les abonnés au réseau cellulaire mobile*

Les abonnements téléphoniques mobiles sont les abonnements à un service de téléphonie public mobile utilisant la technologie cellulaire, qui fournissent un accès au réseau téléphonique public commuté. Les abonnés Post-payés et prépayés sont inclus.

## VIII. FINANCES ET STATISTIQUES MONÉTAIRES

### Statistiques monétaires

Les données de cette section proviennent essentiellement des banques centrales africaines et de la base de données sur les Statistiques financières internationales du FMI.

#### *Monnaie (M1)*

La masse monétaire au sens strict (M1) comprend les dépôts transférables et la circulation fiduciaire hors banques.

#### *Quasi-monnaie*

La quasi-monnaie englobe les dépôts à terme, les dépôts d'épargne et les dépôts en devises.

#### *Avoirs extérieurs nets*

Les avoirs extérieurs nets sont égaux à la somme des avoirs extérieurs moins la somme des engagements extérieurs des autorités monétaires et des banques créatrices de monnaie.

### **Crédits intérieurs**

Le crédit intérieur est égal à la somme des créances nettes sur l'Etat, sur les entreprises publiques et le secteur privé. Le crédit au secteur privé est présenté séparément mais en tant que sous-groupe du crédit intérieur.

### **Réserves internationales**

Les réserves internationales comprennent les avoirs du pays en or monétaire, droits de tirage spéciaux (DTS) et devises, ainsi que ses réserves auprès du Fonds monétaire international (FMI).

### **Taux de change**

Les taux de change, exprimés en unité de monnaie nationale par rapport au dollar EU, sont indiqués comme des taux de fin de période et des moyennes sur la période des taux de change du marché et des taux officiels. Le taux du marché est défini comme le taux déterminé grosso modo par les forces du marché; et le taux officiel est celui fixé par les autorités.

### **Finances publiques**

Les données de cette section sont principalement collectées par les autorités nationales, telles que les instituts nationaux de statistiques, les ministères des finances et les banques centrales ; quand les sources nationales ne sont pas disponibles, les données des publications du FMI (rapports des pays) sont employées.

Pour le Botswana, l'Egypte, l'Ethiopie, le Kenya, le Malawi, les îles Maurice, la Namibie, l'Afrique du Sud et le Swaziland, les données ont été compilées selon l'année fiscale, comme données annuelles. Ainsi, les années 2006 à 2014 représentent bien l'année civile selon la période fiscale de chaque pays.

### **Recettes totales et dons**

Les recettes publiques incluent toutes les recettes non remboursables de l'Etat, avec ou sans

contrepartie, provenant d'autres administrations (locales ou étrangères) et des institutions internationales.

### **Recettes fiscales**

Les recettes fiscales regroupent les impôts, taxes, droits et autres transferts obligatoires autres que les cotisations de sécurité sociale. Elles sont la principale source de revenu de la plupart des administrations publiques et constituent des transferts obligatoires vers ce secteur.

### **Recettes non fiscales**

Elles regroupent les impôts sur les revenus de la propriété, les droits et taxes non industrielles et les ventes de biens existants, les amendes, les pénalités, les confiscations, les indemnités accordées par un tribunal, et les transferts volontaires autres que les dons.

### **Dons**

Les dons sont des transferts non obligatoires courants ou en capital qu'une administration publique peut recevoir d'une autre administration publique ou d'une organisation internationale.

### **Dépenses et prêts nets**

Ils comprennent tous les paiements non remboursables effectués par l'Administration publique, avec ou sans contrepartie, y compris les dépenses courantes et en capital, les transactions au titre de la dette publique et les participations au capital pour des raisons de politique publique.

### **Dépenses courantes**

Elles comprennent tous les paiements non remboursables effectués par l'Administration publique, avec ou sans contrepartie, autres que les dépenses en capital ou les subventions.

### **Dépenses en capital**

Il s'agit des dépenses pour l'acquisition d'immobilisations, des stocks, des terrains ou des actifs

incorporels ainsi que les transferts sans contrepartie dans le but de permettre au bénéficiaire d'acquies ces actifs. Pour être classé comme un capital, un bien acquis doit dépasser une valeur minimale et être destiné à plus d'un an d'utilisation dans le processus de production.

### **Prêts nets**

Les prêts nets (total des prêts moins les remboursements) comprennent les transactions de l'Etat relatives aux créances sur des tiers obtenues à des fins de politique publique plutôt que d'en tirer profit. Ce chiffre porte à la fois sur les paiements et les recettes.

### **Déficit fiscal**

L'excédent/déficit global des finances publiques est la différence entre, d'une part, les recettes courantes, les recettes en capital et les dons publics reçus et, d'autre part, les dépenses totales et les prêts moins les remboursements.

## **Balance des paiements**

La balance des paiements est un état statistique où sont résumées, pour une période donnée, les transactions économiques d'une économie avec le reste du monde. Les transactions, pour la plupart entre résidents et non-résidents, sont celles qui portent sur les biens, services et revenus; celles qui font naître des créances financières sur le reste du monde ou des engagements financiers envers celui-ci et celles qui sont considérées comme des transferts, pour lesquels il y a lieu de passer des contre-écritures de manière à solder les transactions à sens unique. Les données de cette section proviennent des Banques centrales africaines. Lorsque ces données ne sont pas disponibles ou de mauvaise qualité, les Rapports pays du FMI ont été utilisés en remplacement. Les données provenant de sources internationales portent sur les pays suivants : République Centrafricaine, Erythrée et Guinée.

### **Balance commerciale**

Elle est égale à la différence entre les exportations et les importations de biens, évalués sur la base f.à.b (franco à bord) c'est-à-dire à la frontière du pays exportateur. Le poste des biens englobe les marchandises générales, les biens importés ou exportés pour subir une transformation, la valeur des réparations de biens, les biens achetés dans les ports par les transporteurs non-résidents, et l'or non monétaire.

### **Balance des services**

Les services recouvrent les transports (Fret et transport international des passagers), la rubrique des voyages, les services de communication, les services des bâtiments et travaux publics, les services d'assurance, les services d'informatique et d'information; les redevances et droits de licence: les services personnels, culturels et relatifs aux loisirs; les services fournis ou reçus par les administrations publiques. La balance des services est définie par les revenus moins les paiements au titre des services.

### **Revenus nets**

Le poste revenus enregistre deux types de flux: ceux qui relèvent de la rémunération des salariés qui comprend les salaires, traitements et autres prestations; et ceux qui correspondent au revenu des investissements qui comprend les revenus des investissements directs, des investissements de portefeuille et d'autres investissements.

### **Rémunération des salariés**

Les rémunérations des salariés comprennent les salaires, gages, traitements versés par des employeurs non résidents à leurs salariés résidents et inversement.

### **Revenus des investissements**

Les revenus des investissements couvrent les revenus des investissements directs, les revenus des investissements de portefeuille (participation au ca-

pital et titres de créance) ainsi que les autres revenus d'investissement (intérêts provenant d'autres opérations financières).

### **Transferts courants**

Les transferts courants sont tous ceux qui ne font pas intervenir : i) le transfert de propriété d'un actif fixe, ii) le transfert de fonds lié ou subordonné à l'acquisition ou à la cession d'un actif fixe, iii) la remise, sans contrepartie, d'une dette par un créancier.

### **Transferts officiels nets**

Transferts officiels nets comprennent les paiements de transfert net entre les gouvernements du pays déclarant et le reste du monde

### **Envois de fonds des travailleurs**

Les envois de fonds des travailleurs reprennent les montants transférés à l'étranger par des travailleurs résidents et vice-versa

### **Autres transferts privés**

Autres transferts privés comprennent les paiements de transfert net entre personnes privées et des organisations non officielles du pays déclarant et le reste du monde qui ne transportent aucune provision pour les remboursements.

### **Solde du compte courant**

La balance des comptes des opérations courantes est la somme des exportations nettes des biens et services, du revenu net et des transferts courants nets.

### **Compte de capital**

Le compte de capital reprenant les transferts internationaux de capitaux (ex. annulation de dette) et l'acquisition/ la cession d'actifs non produits et non financiers

### **Compte financier**

Le compte financier reprenant les opérations impliquant un transfert de propriété de parties de l'actif

et du passif d'une économie par rapport au reste du monde, parmi lesquelles les achats internationaux de titres tels que des actions ou des obligations.

### **Erreurs et omissions**

Erreurs et omissions nettes sont calculées de façon résiduelle comme la différence entre le total des recettes et des dépenses (courantes et en capital ainsi que le compte financier).

### **Balance générale**

La balance des paiements est un registre des transactions internationales d'un pays avec le reste du monde. Les opérations sont organisées dans deux comptes différents, le compte courant et le compte capital et financier.

### **Dette extérieure et flux financiers**

Les données de cette section proviennent essentiellement des sources internationales suivantes: la base de données sur les « Perspectives de l'économie mondiale » du FMI, les bases de données en ligne de l'OCDE et de la CNUCED. Cependant, quelques pays ont fourni leurs données pour cette édition de l'annuaire. L'objectif de l'annuaire est d'inclure les données fournies par les pays eux-mêmes dans la mesure du possible pourvu que la qualité des données le permette. Les données nationales proviennent des pays suivants : Bénin, Burkina Faso, Cameroun, Guinée Equatoriale, Lesotho et Niger.

### **Dette extérieure totale**

La dette extérieure totale est le montant dû mais non remboursé, à un moment donné, par les résidents d'un pays à des non-résidents, et qui se sont engagés à rembourser le principal, avec ou sans intérêt, ou à payer les intérêts avec ou sans le principal. Elle est la somme de la dette publique, de la dette garantie publique, de la dette privée non garantie à long terme, du recours au crédit du FMI et de la dette à court terme.

### **Service de la dette extérieure**

Le service total de la dette (extérieure) est la somme des remboursements du principal et des paiements des intérêts. Il s'agit du service de la dette à court terme et de la dette à long terme (dette publique, dette privée à garantie publique et dette non garantie privée) et du recours au crédit du FMI.

### **Valeur actuelle de la dette extérieure**

La valeur actualisée de la dette est la somme de la dette extérieure à court terme plus la valeur actualisée du total des paiements du service de la dette dus sur la dette extérieure à long terme publique et garantie par l'État et la dette extérieure à long terme privée non garantie au cours de la vie des prêts existants.

### **Dette publique intérieure**

La dette publique intérieure : détenue par les agents économiques résidents de l'État émetteur et libellée en monnaie nationale.

### **Investissements directs étrangers**

L'investissement direct étranger représente l'investissement effectué pour acquérir ou accroître une participation durable au capital d'une entreprise (généralement 10 pourcent du pouvoir de vote) opérant dans un pays autre que celui de l'investisseur. C'est la somme du capital social, du réinvestissement des bénéfices et d'autres capitaux à court et à long termes comme il est indiqué dans la section traitant de la balance des paiements

### **Aide publique au développement**

L'APD représente les dons et les prêts accordés à des conditions financières privilégiées (c'est-à-dire avec un élément de libéralité d'au moins 25 pour cent) au secteur public dans le but principal de promouvoir le développement économique et le bien-être social. Il s'agit des décaissements nets d'APD.

## **IX. COMMERCE EXTERIEUR**

Les données pour cette section proviennent majoritairement des sources nationales. C'est le cas des pays suivants : Algérie, Bénin, Burkina Faso, Burundi, Cameroun, Côte d'Ivoire, Egypte, Ethiopie, Gambie, Guinée Bissau, Kenya, Malawi, Mali, Maroc, Mozambique, Namibie, Niger, Nigeria, Rwanda, Soudan, Swaziland, Tanzanie, Togo, Zambie et Zimbabwe. Dans le cas où des données nationales n'ont pu être trouvées, nous avons eu recours à la base de données en ligne de la CNUCED. Les noms des principaux produits d'exportation et d'importation ont été choisis par les pays eux-mêmes. Pour les données obtenues de la CNUCED la nomenclature du système harmonisé (rev1) a été employée pour déterminer la liste des produits principaux d'exportations et d'importation. Sauf indication contraire, les statistiques d'importation sont valorisées sur la base CAF tandis que les exportations sont valorisées FOB.

## MILLENNIUM DEVELOPMENT GOALS OBJECTIFS DU MILLENAIRE POUR LE DEVELOPPEMENT

### Goal 1. Eradicate Extreme Poverty and Hunger / Eradiquer la pauvreté extrême et la faim

|   |   |   |   |
|---|---|---|---|
| Population below \$1.90 (PPP) per day, percentage   | Poverty gap ratio at \$1.90 a day (PPP), percentage | Poorest quintile's share in national income or consumption, percentage          | Population undernourished, percentage                       |
| Proportion de la population disposant de moins de 1,90 \$ par jour en parité du pouvoir d'achat | Ecart de pauvreté au seuil de 1.90 \$ par jour (%)  | Part du quintile le plus pauvre de la population dans la consommation nationale | Prévalence de la malnutrition dans la population totale (%) |

| Country                          | Population below \$1.90 (PPP) per day, percentage |      | Poverty gap ratio at \$1.90 a day (PPP), percentage |      | Poorest quintile's share in national income or consumption, percentage |     | Population undernourished, percentage |             | Pays                       |
|----------------------------------|---|------|---|------|--|-----|---------------------------------------|-------------|----------------------------|
|                                  | year  | %    | year  | %    | year   | %   | 1990–1995                             | 2013–2015   |                            |
