### **General Disclaimer**

The designation employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of the ECA Secretariat concerning the legal status of any country or territory, or of its authorities or concerning the delimitation of its frontiers or boundaries. The designation and presentation were adopted solely for the purpose of providing a convenient geographical basis for the statistical data.

### **Denis de responsabilité**

Les appellations employées dans cette publication et la présentation des données qui y figurent n'impliquent de la part du secrétariat de la CEA aucune prise de position quant au statut juridique de tel ou tel pays ou territoire, ou de ses autorités, ni quant au tracé de ses frontières. Les dites appellations et ladite présentation n'ont été adoptées que pour donner un cadre géographique commode aux données statistiques publiées.

## **INTRODUCTION**

This edition of the “Integrated National and Sub Regional Economic, Social and Environmental Indicators “ provides detailed economic trends for each African country by sector.

In expanding the theme of the series, ECA has been attempting to present a more comprehensive picture of economic conditions in Africa.

This publication attempts to serve users and policy makers who need a detailed picture and information, including the breakdown of Gross Domestic Products (GDP), with the following tables: GDP by industry at current prices, GDP by industry at constant prices, and GDP by expenditure at current and constant prices.

These detailed information on supply and use of GDP at current and constant prices are very critical information for better economic management and policies and it is our expectation that this publication will meet the needs of users at both the international, regional, sub regional and national levels, in particular the planning data for the African economies.

These detailed “supply and use of GDP at current and constant prices” are the most widely economic data published, annually by national agencies, which compile national accounts, including National Statistical Offices, Central Banks and planning departments.

Given the limited resources of these national institutions, these are the minimum set of national accounts, which are available for most African countries.

## **1. Data Sources**

The data contained in this publication come from various sources: the main sources of the data are the ECA member States, including Statistical agencies, Central Banks and economic departments. Statistical data are collected through national publications sent or e-mailed to ECA, in addition to those collected during meetings and workshops.

Alternative data sources include online access to national, sub regional and international organizations, including website of National Statistical Offices, AFRISTAT, IMF, and the World Bank. After accessing all sources, estimation procedures have, where possible, been used to fill any remaining data gaps, including the breakdown of GDP by expenditure or by industries.

## **2. Systems of National Accounts**

The concepts and definitions used for National Accounts in most African countries are the 1968 System of National Accounts (1968 SNA) or the 1993 System of National Accounts (1993 SNA). These two systems of national accounts are jointly used by countries. The main differences between the two systems consist in the way GDP is computed: the 1993 SNA provides more concise definitions and concepts regarding the production boundary and therefore a more comprehensive accounting of GDP and its breakdown.

Most countries are under transition from the 1968 SNA to the 1993 SNA, while limited number of countries is using the 1993 SNA.

### **3. Coverage**

This volume contains data for the following African countries classified by language and sub region. The language classification distinguishes English from French speaking countries. The publication also uses the following sub regional classification within each language grouping:

North Africa:	Algeria, Egypt, Libyan Arab Jamahiriya, Mauritania, Morocco, Sudan and Tunisia.
West Africa:	Benin, Burkina Faso, Cape Verde, Côte d'Ivoire, Gambia, Ghana, Guinea, Guinea-Bissau, Liberia, Mali, Niger, Nigeria, Senegal, Sierra Leone and Togo.
Central Africa:	Cameroon, Central African Republic, Chad, Congo, Equatorial Guinea, Gabon, and Sao Tome & Principe.
East Africa	Burundi, Comoros, Democratic Republic of Congo, Djibouti, Eritrea, Ethiopia, Kenya, Madagascar, Rwanda, Seychelles, Somalia, Tanzania (United Republic of) and Uganda.
Southern Africa:	Angola, Botswana, Lesotho, Malawi, Mauritius, Mozambique, Namibia, South Africa, Swaziland, Zambia and Zimbabwe.

### **4. Valuation**

Generally, GDP by industry are valued at basic prices or at factor cost, GDP by expenditure are valued at market prices, which includes taxes on products, transportation and commercial margins.
