Workshop on sound institutional environment, cooperation, dialogue and partnerships for the production and utilization of SDG indicators

The African context and workshop outputs

- Fatouma Sissoko
- African Centre for Statistics

- Libreville, Gabon, 3-5 July 2017

1

Outline

- **The African context**
- **Objectives and outcome of the workshop**
- **The DA 10 in Africa**

The African Context: the Agenda 2063 & 2030

The African Context

- Assessment & implementation of the SDGs need to be critically strengthened at all levels of the capacity of statistical systems to produce timely & reliable statistics and data

- African countries have already committed to implement SDGs and adopted all the targets that are relevant

- Some countries have started the SDG's domestication process

- African countries have a another ambition to support Agenda 2063

- Some countries are in the process of integrating SDGs into the existing development frameworks
  - For some it is proving to be a challenge
  - This requires discussions on national indicator framework on process which also includes Agenda 2063

The African Context: SHaSA

- The Strategy for the Harmonization of Statistics in Africa (SHaSA) aims to enable the African Statistical System to generate timely, reliable, and harmonized statistical information, covering all aspects of political, economic, social, and cultural integration for Africa.

- The SHaSA is being revised to be the backbone for the provision of data on indicators for monitoring the implementation of the two agendas

- Pan African institutions have aligned the First 10-Year Implementation Plan of Agenda 2063 and SDGs with the SHaSA

What are the objectives of the workshop

- Address the institutional environment for official statistics in support of monitoring progress towards the SDGs

- Help to achieve a common and improved understanding about institutional, organizational and managerial arrangements that can best sustain the transformation and modernization of official statistics to address emerging user needs for high-quality and internationally comparable data and statistics

- Reflect on the roadmaps for the development of a clear set of strategies to strengthen national statistical systems and their deliverables in line with the Global Action Plan

What are the objectives of the workshop

- contribute to the development of guidelines, compilations of best practices and other training material at global and regional levels illustrating the impact of institutional, organizational and managerial arrangements on the capacity of national statistical systems to embrace the necessary transformation of official statistics

Outcome

- Raise awareness of the programme among countries and partners

- Understanding about institutional, organizational and managerial arrangements that can best sustain the transformation and modernization of official statistics to address emerging user needs improved

- Contribution to the development of guidelines and training material to be prepared by the consultants involved in this activity on sound institutional framework for official statistics in developing countries for measuring and monitoring the SDGs

- Contribution to the update of the UN Handbook on Statistical Organizations with the aim of providing guidance and best practices to achieve a modern, more integrated and coordinated national statistical system

The DA 10 in Africa

Pillar 1: Means of implementation

Pillar 2: Environment

Pillar 3: Social and Demographic

- Population and demographics statistics
- Gender Statistics;
- Crime and Criminal justice Statistics.

Pillar 4: Economic

The DA 10 in Africa

Pillar 1: Means of implementation

- To enhance capacity of developing countries to strengthen statistical institutional environments and production processes across multiple statistical domains to measure, monitor and report on the 2030 Sustainable Development Agenda

Pillar 2: Environment

Pillar 3: Social and Demographic

Pillar 4: Economic

The DA 10 in Africa

Pillar 1: Means of implementation

Pillar 2: Environment

- Strengthen the capacity of African countries to produce and compile natural capital accounts and the resulting indicators to support the measuring, monitoring, and reporting of the SDGs (Goals: 2, 6,7,12,13,14, 15)

Pillar 3: Social and Demographic

Pillar 4: Economic

The DA 10 in Africa

Pillar 1: Means of implementation

Pillar 2: Environment

Pillar 3: Social and Demographic

- • Strengthen capacity in developing countries to measure and monitor sustainable development goal indicators in social and demographic statistics areas.

Pillar 4: Economic

The DA 10 in Africa

Pillar 1: Means of implementation

Pillar 2: Environment

Pillar 3: Social and Demographic

Pillar 4: Economic

- Strengthen the capacity of African countries to measure and monitor sustainable development goals indicators in economic statistics areas. Goals: 2, 7, 8, 9, 10, 11, 12, 14, 16, 17

Focus of activities - DA 10 in Africa

- Technical and training workshops (regional, sub-regional and national)

- Capacity building

- Guideline and training material addressing specifics issues (data disaggregation...), technical reports, E-learning portal

- Work closely with selected pilot countries for each pillar and component. 8 countries for the pillar organizing this workshop

- Technical advisory mission to specifics countries

Thank you
