National training workshops with producers and users of gender statistics

Purpose of the Workshop

II – Objective

The main objective of this national training workshops is to strengthen capacity of statistical offices in communicating their statistics, in particular for selected Tier I indicators (SDG 3, 4, 5, 8), to different user groups and to improve gender statistics literacy of data users. This workshop will also be useful for the preparation of national reviews and reports for the review and follow up of the 2030 Agenda for Sustainable Development as well as of national publications on the situation of women. It is intended to staff of national statistical offices, government agencies, NGOs and academic users of gender statistics. It will utilize the regional gender statistics toolkits in support of the training.

Specific Objectives of the workshop are to:

- Expose participants to the fundamentals of producer-user dialogue in gender statistics production

- Provide participants with the basis for mainstreaming gender concerns into various aspects of their work.

- Reinforce capacity of participants on the principles for the production of gender statistics to assess the gender responsiveness of the national statistical system

- Inform participants about the requirements of gender statistics and make knowledgeable them with the key gender concerns in national development

III. Methodology

The meeting will be organized in three days. It will be conducted in both plenary and group sessions. The main topics of the workshop are:

- Gender issues and statistics

- Production and Use of Gender Statistics

- Requirements of gender mainstreaming in statistics

- Gender-responsiveness of the national statistics system

- Strategic organization and planning

- Way forward

IV - Expected outcomes

- Enhanced capacity of member states in mainstreaming gender perspective into national statistical systems and in the production of gender statistics;

- Strengthened capacity of countries to produce Tier I SDG gender indicators through better integration of a gender perspective into national statistics.

- Better understanding by key actors in gender analysis and gender statistics of the importance of

- Dialogue between producers and users dialogue of gender statistics in the improvement of availability and improvement of gender statsistics

- gender statistics on evidence-based development policy and programs information and formulation as well as on the effective achievement of the these policies and

- Improved availability and use of gender statistics at the national, regional and international levels for better evidence-based gender policies.

Monday 02 ctober 2017	Module I: Gender issues and statistics
