
Mainstreaming Climate Change in Development Planning– AfDB Experiences: Pilot Programme for Climate Resilience

Paxina Chileshe

Agriculture & Agro-Industry Department,
African Development Bank

CCDA II

19- 20 October 2012
Addis Ababa

Presentation Outline

- ❑ Objectives
- ❑ The Process
- ❑ Strategic Programmes for Climate Resilience
- ❑ Early Lessons
- ❑ Country cases
- ❑ Conclusion

- ❑ Context Information
 - ❑ Pilot Programme for Climate Resilience
 - ❑ Pilot Countries
 - ❑ Governance structure
 - ❑ Time line

Objectives and Outcomes

- ❑ Provide incentives for scaled-up action and transformational change through pilot projects that demonstrate how to integrate climate risk and resilience into core development planning
- ❑ Expected Outcomes
 - ❑ increased capacity to integrate climate resilience into development strategies;
 - ❑ a more inclusive approach to climate resilient growth and development;
 - ❑ an increased awareness of the potential impact of climate change;
 - ❑ scaled-up investment for broader interventions and programming related to climate resilience; and
 - ❑ improved coordination among stakeholders regarding country-specific climate resilient programs.
- ❑ Two Phases of implementation

The Process

- ❑ Scoping – stock taking of existing programmes and initiatives
- ❑ National consultations for climate sensitive sectors prioritisation
- ❑ Knowledge gap analysis - development of Phase I proposals
- ❑ Elaboration of investment plans – development of Strategic Programmes for Climate Resilience (SPCRs)
- ❑ Regional level consultations to validate SPCR
- ❑ Detailed designing of interventions outlined in SPCR
- ❑ Local level consultations for ownership and enhancing implementation

Strategic Programmes for Climate Resilience

- ❑ Analysis of main climate risks and climate sensitive sectors – based on NAPAs and other studies and reports
- ❑ Analysis of main development challenges and potential impact of climate change – based on national development plans and analytical work
- ❑ Stock taking of existing initiatives, results achieved and lessons learnt
- ❑ Review existing regulatory frameworks, policies and strategies to address climate change
- ❑ Broad consultation among the actors at national, regional and local levels to gain a consensus
- ❑ Scoping of interventions based on priority climate sensitive sectors, level of vulnerability and readiness
- ❑ Develop a results framework to monitor results and progress

Early Lessons

- ❑ Allowing time for broad consultation and prioritisation
- ❑ Effective institutional, policy and regulatory frameworks for climate change
- ❑ Integrating climate resilience into sensitive sector strategies
- ❑ Climate Change Coordination between budgeting Ministry and environment as well as other Line Ministries
- ❑ Raising awareness of climate change issues among law and policy makers
- ❑ Piloting climate-resilience through projects in priority sectors, which enables tracking of results
- ❑ Private sector participation is essential but remains a challenge
- ❑ Synergy of actions among partners is imperative at each step
- ❑ Blend financing can be attractive to address climate change

Mozambique

- ❑ Key Climate Risks and Sectors
 - Droughts, Floods and Cyclones
 - Agriculture, natural resources, coastal infrastructure and water resources
- ❑ Coping Strategies at community level
 - Casual labour, selling livestock, eating less-preferred foods, reducing the number of meals and utilizing the seed stock for the next growing season.
- ❑ PPCR Interventions
 - Sustainable Land & Water Resources Management (AfDB)
 - Climate Resilient Agricultural Production (AfDB)
 - Introducing climate-resilience in Mozambique's transport sector (WB)
 - Coastal cities and climate change (WB)
 - Transforming the hydro-meteorological services (WB)
 - Urban Water, Forest (IFC)

Niger

- ❑ Key Climate Risks and Sectors
 - Droughts, Floods, Heat Waves and Sand Storms
 - Agriculture, natural resources, livestock, water resources and health
- ❑ Coping Strategies at community level
 - Community based networks and household budget reallocation
- ❑ PPCR Interventions
 - Improvement of Climate Forecasting Systems and Operationalization of Early Warning Systems (AfDB)
 - Sustainable Management and Control of Water Resources Sustainable Land Management (AfDB)
 - Community Action Project for Climate Resilience (WB)
 - Weather Index Insurance, Climate Information, Resilience Technology and Techniques (IFC)

Zambia

□ Key Climate Risks and Sector

- Droughts and Floods
- Agriculture, natural resources, human health, energy and water

□ Coping Strategies at community level

- Diversification of production systems which include expansion of rice cultivation, fish farming, conservation farming, pig keeping and introduction of small-scale irrigation schemes, reliance on wild foods, reallocation of household budgets, borrowing funds or food, increased reliance on casual labor and stolen crops and livestock.

□ PPCR Interventions

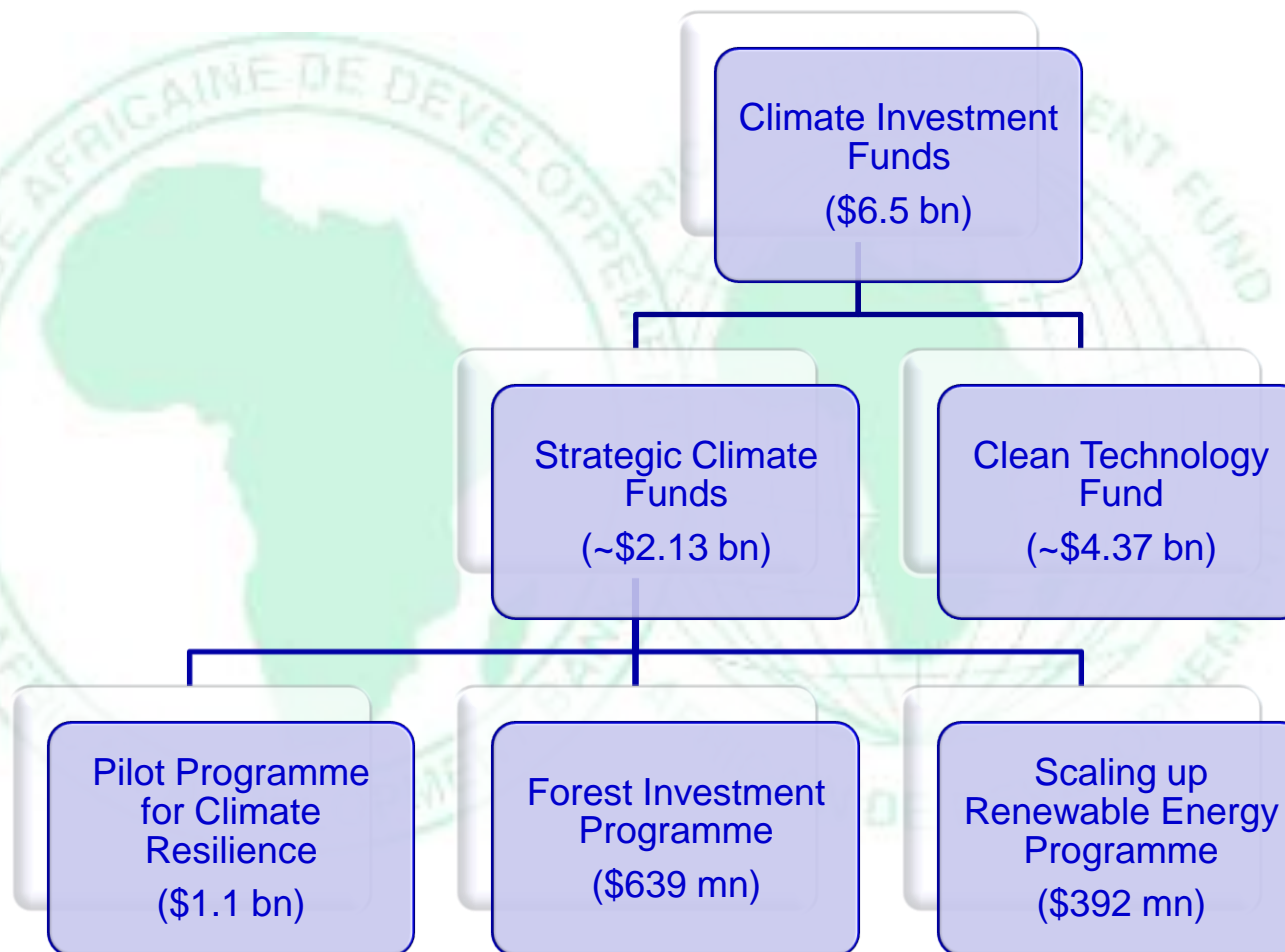

- Strengthening Climate Resilience in the Kafue sub-basin (AfDB)
- Strengthening Climate Resilience in the Barotse sub-basin (IBRD)
- Private Sector Support to Climate Resilience (IFC)

Conclusion

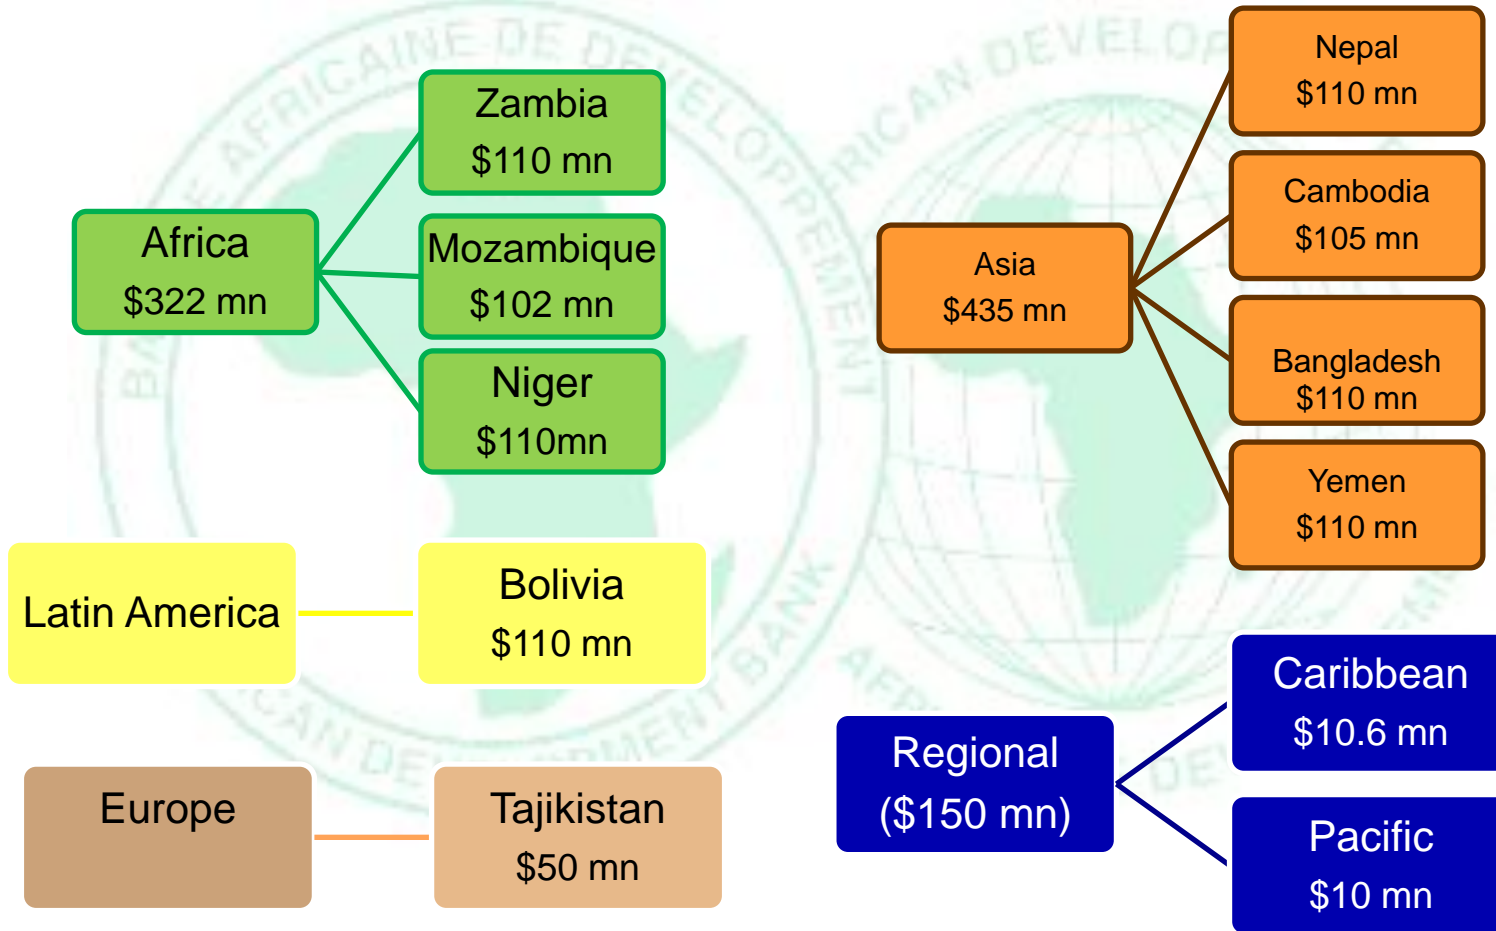

- ❑ The challenge of climate change and development requires further investments in areas such as:
 - Functional climate information systems and improved analysis to reduce climate risks and make informed decisions
 - Private sector investment to enhance climate resilience in key economic sectors
 - Documenting evidence and lessons for policy, planning and to understand and fill gaps in other sectors (e.g. social)
 - Establishing an M and E framework to capture the effects/ impact of various programmes and initiatives

- ❑ Further information on the PPCR and other CIF Programmes is available on:
 - www.climteinvestmentfunds.org/cif

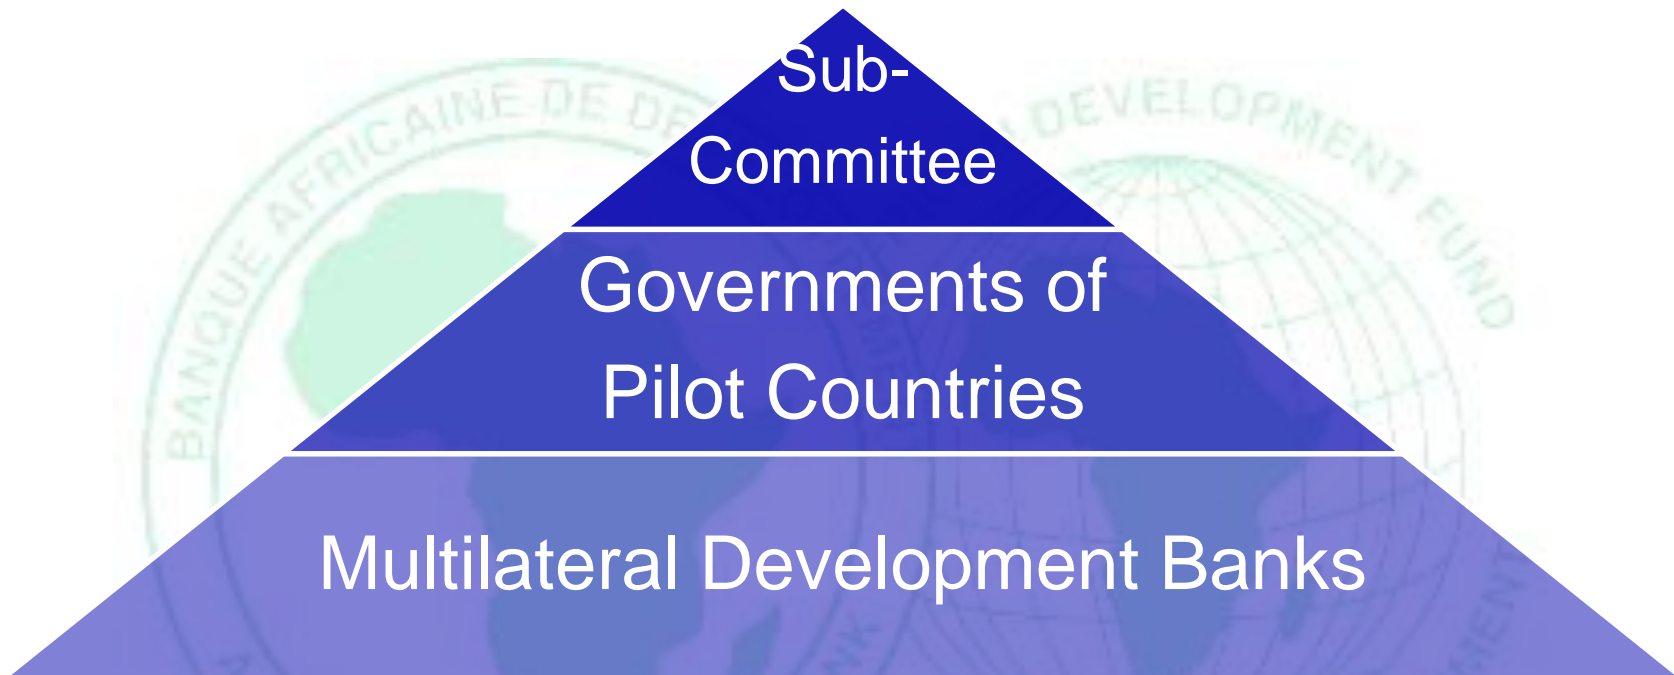

Climate Investment Funds

PPCR Pilot Countries

Governance

Phase I: Development of a Strategic Program for Climate Resilience (SPCR), outlining an underlying investment program.

Phase II: Implementation of the SPCR through actions such as support to policy reform, institutional capacity building and scaling-up investments in key sectors.

Time line
